

#### Features

- · Constant Voltage + Constant Current mode output
- MEAN WELL patented circular metal housing with class I design(Patent No.: CN201220314551)
- Built-in active PFC function
- IP67 / IP65 rating for indoor or outdoor installations
- Function options: output adjustable via potentiometer;
   3 in 1 dimming; DALI
- Typical lifetime>50000 hours
- 5 years warranty

### Applications

- LED high/low bay lighting
- · LED canopy lighting
- · LED stage lighting
- · LED spot lighting
- · Outdoor architectural lighting system
- Type "HL" for use in Class I, Division 2 hazardous (Classified) location.

#### Description

HBG-200 series is a 200W AC/DC LED driver featuring the circular shape design. It operates from  $90{\sim}305$ VAC and offers the dual modes constant voltage and constant current output models with different rated voltage between 36Vand 60V. Thanks to the high efficiency up to 93.5%, with the fanless design, the entire series is able to operate for  $-40^{\circ}\text{C} \sim +85^{\circ}\text{C}$  case temperature under free air convection. The design of metal housing and IP67/IP65 ingress protection level allows this series to fit both indoor and outdoor applications. HBG-200 is equipped with various function options, such as dimming methodologies, so as to provide the optimal design flexibility for LED lighting system.

#### ■ Model Encoding

|             | PACKING 1.53Kg; 8pcs/13.8Kg/1.61CUFT  1. All perspectors NOT procedure most and are processed at 220 VAC input, rated autrant and 25°C of embient temporature.   |  |             |  |  |  |
| NOTE        | <ol> <li>All parameters NOT specially mentioned are measured at 230VAC input, rated current and 25℃ of ambient temperature.</li> <li>Please refer to "DRIVING METHODS OF LED MODULE".</li> <li>Ripple &amp; noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf &amp; 47uf parallel capacitor.</li> <li>Tolerance: includes set up tolerance, line regulation and load regulation.</li> <li>De-rating may be needed under low input voltages. Please refer to "STATIC CHARACTERISTIC" sections for details.</li> <li>Length of set up time is measured at cold first start. Turning ON/OFF the driver may lead to increase of the set up time.</li> <li>The driver is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.</li> <li>To fulfill requirements of the latest ErP regulation for lighting fixtures, this LED driver can only be used behind a switch without permanently connected to the mains.</li> <li>This series meets the typical life expectancy of &gt;50,000 hours of operation when Tcase, particularly (to) point (or TMP, per DLC), is about 70℃ or less.</li> <li>Please refer to the warranty statement on MEAN WELL's website at http://www.meanwell.com</li> <li>The ambient temperature derating of 3.5℃/1000m with fanless models and of 5℃/1000m with fan models for operating altitude higher than 2000m(6500ff 12. For any application note and IP water proof function installation caution, please refer our user manual before using. https://www.meanwell.com/Upload/PDF/LED_EN.pdf</li> </ol> |  |             |  |  |  |

#### ■ BLOCK DIAGRAM

fosc: 100KHz

#### ■ DRIVING METHODS OF LED MODULE

X This series is able to work in either Constant Current mode (a direct drive way) or Constant Voltage mode (usually through additional DC/DC driver) to drive the LEDs.

Typical output current normalized by rated current (%)

In the constant current region, the highest voltage at the output of the driver depends on the configuration of the end systems.

Should there be any compatibility issues, please contact MEAN WELL.

#### **■ DIMMING OPERATION**

#### **※** 3 in 1 dimming function (for B/AB-Type)

- Output constant current level can be adjusted by applying one of the three methodologies between DIM+ and DIM-: 0 ~ 10VDC, or 10V PWM signal or resistance.
- $\cdot \ \mathsf{Direct} \ \mathsf{connecting} \ \mathsf{to} \ \mathsf{LEDs} \ \mathsf{is} \ \mathsf{suggested}. \ \mathsf{lt} \ \mathsf{is} \ \mathsf{not} \ \mathsf{suitable} \ \mathsf{to} \ \mathsf{be} \ \mathsf{used} \ \mathsf{with} \ \mathsf{additional} \ \mathsf{drivers}.$
- Dimming source current from power supply:  $100\mu A$  (typ.)

#### O Applying additive 0 ~ 10VDC

"DO NOT connect "DIM- to -V"

 $\bigcirc$  Applying additive 10V PWM signal (frequency range 100Hz ~ 3KHz):

"DO NOT connect "DIM- to -V"

#### O Applying additive resistance:

"DO NOT connect "DIM- to -V"

Note: 1. Min. dimming level is about 8% and the output current is not defined when 0% < Iout < 8%.

2. The output current could drop down to 0% when dimming input is about  $0k\Omega$  or 0Vdc, or 10V PWM signal with 0% duty cycle.

Note: In the case of turning the lighting fixture down to 0% brightness, please refer to the configuration as follow, or please contact MEAN WELL for other options.

Using a switch and relay can turn ON/OFF the lighting fixture.

#### ※ DALI Interface (primary side; for DA-Type)

- · Apply DALI signal between DA+ and DA-.
- DALI protocol comprises 16 groups and 64 addresses.
- First step is fixed at 8% of output.

#### ■ INSTALLATIONS

#### Caution

- Please inspect the appearance of the driver if the package is damaged. There should not be any cracks.
- \* Please do not drop or bump the driver.
- \* All screws including the suspension screw should be paired with a spring washer and locked tight.
- \* The entire luminaire, including the driver, should be limited to 10Kg or less.
- \* The luminaire should be cautiously protected from damage due to shock throughout packaging and transportation.
- \* Please thoroughly follow the preceding cautionary notes to prevent the luminaire from falling, leading to injuries.
